Personal statement {

I am experienced Java developer that is mostly focused on backend but with a strong frontend development background in the past. I am open to challenges and new technologies and have a *nothing-is-impossible-if-legal* mindset.

}

Skills { /* please ask if something is missing */

Java : [Spring, Groovy, Grails, Tomcat]
Testing : [junit, EasyMock, Mockito, JMeter, Postman]
Builds : [Maven, Gradle, Git, Docker, SVN, Jenkins, TeamCity]
Web : [HTML, JS, jQuery, CSS, Twitter Bootstrap, AngularJS]
DBs : [Oracle, MySQL, JDBC, Hibernate]
Other : [PowerShell, PHP, C#, Jira, Windows, Linux, UX, UML, Codenvy]
Methodologies : [Scrum, Kanban, SAFe, RUP]

}

Education {

B.S. Computer Science 2005 - 2009; M.S. Computer Science 2009 - 2011, Russia
Saint Petersburg State University of Informational Technologies

}

Projects & Experience { /* sorted descending */

Digital eXperience Accelerator, at SDL, in Amsterdam { Oct 2015 - now

Environment { Java, Spring, Maven, Gradle, Jenkins }

Description {

Open-source API wrapper for the complex content management system.
Intention is to help developers implementing custom applications using the company's main product. Implemented simultaneously in Java & .NET.

}

Responsibilities {

- Main (out of two) Java developer, I work here in close relation with ".NET half" in order to implement the same API in both technologies.
- Communication with customers and project community
- Coaching of a junior Java developer.

}

Code example { /* because it is public */

Developers API framework: <https://goo.gl/QDfbzt>

Backend service for the framework: <https://goo.gl/KAwicS>

Framework extensions: <https://goo.gl/uGb4JQ>

}
