}                            }
```

```
Personal statement {
  I am an experienced Java developer who is mostly focused on the backend
  but with a strong frontend background in the past. Open to challenges and
  new technologies and have a nothing-is-impossible-if-legal mindset.
}
```

```
Skills { /* anything missing? ask me! */
  Java { Spring, Groovy, Grails, Tomcat }
  Testing { jUnit, EasyMock, Mockito, JMeter, Postman }
  Builds { Maven, Gradle, Git, Docker, SVN, Jenkins, TeamCity }
  Web { HTML, JS, jQuery, CSS, Twitter Bootstrap, AngularJS }
  DBs { Oracle, MySQL, JDBC, Hibernate }
  Other { PowerShell, PHP, C#, Jira, Windows, Linux, UX, UML }
  Methodologies { Scrum, Kanban, SAFe, RUP }
}
```

```
Education {
  B.S. - M.S. 2005 - 2011, Saint Petersburg, Russia
  Computer Science, State University of Informational Technologies
}
```

```
Projects & Experience { /* work since 2006, Java since 2011 */

  Digital eXperience Accelerator /* SDL in The Netherlands */ { 2015 - 2018
    Roles { Java developer }
    Environment { Java, Spring, Maven, Gradle, Jenkins }
    Project description {
      An open-source API wrapper for the complex enterprise CMS. The
      intention was to help developers building custom applications using
      the company's main product. Implemented in Java & .NET.
    }
    Responsibilities {
      - As a main Java developer, I work here in close relation with ".NET
      half" in order to implement the same API in both technologies
      - Communication with customers and project community
      - Coach a junior Java developer
    }
  }
